# 42 Star Projects Transforming Architecture in New York City

BY **HANA R. ALBERTS** JUN 3, 2017, 2:00 PM EDT

All One

# 10 425 Park Avenue - Norman Foster

Eloquently described as "diagonal sinews of steel" and praised for its garden terraces, the building was on hold for a while due to a wait for rezoning that would allow for taller and denser buildings near Grand Central. Despite ongoing delay with rezoning, developers still plan on this 41-story building. This engineering marvel includes feng shui input by Alex Stark of New York City.
